

**The Opportunity to Strengthen Basic Needs  
Supports for California's Post-Secondary  
Students through Partnership and Shared  
Accountability:**

**Recommendations from the Intersegmental Working  
Group on Student Basic Needs**

# **BRIEF**

## **The Opportunity to Strengthen Basic Needs Supports for California's Post-Secondary Students through Partnership and Shared Accountability: Recommendations from the Intersegmental Working Group on Student Basic Needs**

### **Executive Summary**

The California Intersegmental Working Group on Student Basic Needs (Working Group) was established in August 2021 to develop for the Governor's Council for Post-Secondary Education a set of recommendations that identify opportunities to better support student basic needs, and hence student success. This brief features 20 recommendations proposed by the Working Group that focus on streamlining supports, reducing barriers, and maximizing uptake of publicly available resources and services. The recommendations are organized by opportunities to strengthen basic needs support through intersegmental, regional, and state-level partnerships.

### **California Intersegmental Working Group on Student Basic Needs**

The California Intersegmental Working Group on Student Basic Needs (Working Group) consisted of ten higher education leaders, experts, practitioners and student representatives from the University of California, California State University, California Community Colleges, the Association of Independent California Colleges and Universities, and each of the respective statewide student organizations. The group met on a bi-weekly basis for four months and heard from both campus and systems level leaders and researchers working on the issue of student basic needs throughout California. The Working Group was facilitated by Tanya Moore, PhD and supported by Shree Jennifer Ram and Caroline Siegel Singh.

A special thank you goes to Ruben Canedo who served as a technical advisor to the Working Group staff. Additionally, the Working Group appreciated the contributions of many Basic Needs practitioners, researchers, and leaders across higher education segments in California who provided critical early feedback and input to the recommendations. The staff support for the Working Group and the production of this brief was made possible through funding by College Futures Foundation.

## **Working Group Members**

### **Marty J. Alvarado**

Executive Vice Chancellor  
California Community Colleges Chancellor's Office

### **Jenn Galinato**

Interim Vice President of Regional Affairs and Regional Affairs Director, Student Senate  
for California Community Colleges  
Student, Sacramento City College

### **Genie Kim, DSW**

Director, Student Mental Health & Well-Being  
University of California Office of the President

### **Jiseon Kim**

Basic Needs Officer, University of California Student Association  
Student, University of California Los Angeles

### **Pamela Luster, EdD**

President  
San Diego Mesa College

### **Linda McMurdock, PhD**

Vice President for Student Affairs  
Mount Saint Mary's University

### **Tonantzin Oseguera, EdD**

Vice President of Student Affairs  
California State University Fullerton

### **Henoc M. Preciado**

Systemwide Manager, Basic Needs Initiatives  
California State University, Office of the Chancellor

### **Fabiola Moreno Ruelas**

Vice President of Systemwide Affairs, California State Student Association  
Student, San Diego State University

### **Denise Woods DrPH**

Associate Vice Chancellor for Health, Well-being, & Safety  
University of California Riverside

## Overview

For generations, California's world-class higher education system has provided opportunity and socioeconomic mobility, driven research and innovation, and powered economic growth throughout the state.

Today, California's massive higher education system educates nearly 3 million students annually. Most attend a public university (either the University of California, California State University, and California Community Colleges), while a substantial minority attend private non-profit colleges and universities (represented by the Association of Independent California Colleges and Universities). In addition to its premier institutions, California has one of the most generous state financial aid programs in the nation, which allows most low-income undergraduates at public institutions to pay no tuition out of pocket.

However, the years long rise in cost of living poses an affordability crisis for all Californians - which, in turn, impacts students' ability to meet their basic needs. This is most commonly understood as food security and housing stability, both critical for academic success. In a study conducted by the California Student Aid Commission prior to the COVID-19 pandemic, 35 percent of participants reported low or very low food security and 35 percent experienced one or more conditions of housing insecurity. Basic needs also includes other factors, such as healthcare, mental health supports, transportation, and access to technology, that are likewise critical to students' ability to succeed in the classroom. These challenges are especially acute for underrepresented and underserved students – including students of color, low-income students, undocumented students, parenting students, LGBTQ+ students, and justice-involved students.

Since March 2020, the COVID-19 pandemic has exacerbated basic needs insecurity by further destabilizing the lives of those with unmet basic needs and increasing the number of students experiencing multiple instabilities for the first time. Many colleges and universities responded decisively, establishing emergency contracts and intersegmental agreements, expanding access to resources and services, and developing partnerships with community-based organizations to address the increased need. These innovative practices illustrate the higher education sector's ability to adapt to support students when the moment demands.

The Working Group on Basic Needs was tasked with building upon these innovative practices by developing an intersegmental, cost-effective statewide and/or regionalized approach—supported by concrete policy recommendations—to assist students in meeting their basic needs. The Working Group developed a set of 20 priority recommendations, divided into three categories and unified by a working definition of

basic needs and a set of guiding principles. These recommendations are closely aligned with other efforts in the basic needs space, including CSAC's report on CalFresh access and uptake, the California Higher Education Basic Needs Alliance's advocacy, and the UC, CSU, and CCC's work to better understand and address basic needs challenges. It is also aligned with state efforts to meet students' basic needs and make college affordable – including Governor Newsom's multi-year agreements with the UC, CSU, and CCC, investments in basic needs resources and services, and expansion of Cal Grant – and the federal “Dear Colleague” letters aimed at streamlining delivery of services.

## **Basic Needs Working Definition & Guiding Principles**

**Basic Needs are fundamental to students' dignity and success throughout their higher education experience.** They include, but are not limited to:

- Food security;
- Housing security;
- Financial stability;
- Health and wellness;
- Child/dependent care;
- Transportation; and
- Technology and broadband.

Higher education leaders, policymakers, practitioners, and advocates have defined basic needs differently over the years, and definitions of basic needs can evolve as we strive to better understand the diversity of the student experience.

Because of this, the Working Group does not seek to establish a narrow, overly-prescriptive definition of basic needs. Instead, the Working Group established aspirational principles that frame the above broad definition and guide the recommendations:

- 1. Meeting students' basic needs is foundational to affordability, accessibility, and student success throughout higher education.** At the core of basic needs are food security, housing security, and financial stability. Basic needs can also be expanded to include other student supports — described above — that are also key to upholding students' dignity, belonging, academic achievement, and professional success.

2. **Students' challenges with basic needs reflect long-standing struggles with inequality, inequity, and systemic racism.** In addressing basic needs, institutional leaders, policymakers, faculty, and staff should center equity, accessibility, sustainability, and justice, and work to affirm and support students with disproportionate basic needs experiences.
3. **Meeting students' basic needs is a shared responsibility. Higher education institutions cannot solve these issues on their own.** Therefore, higher education entities should collaborate intersegmentally and regionally — with each other, with local and state government, and with philanthropic and community organizations — to more effectively support students along the full spectrum of basic needs.

## **Intersegmental Basic Needs Working Group Recommendations: Offering Stronger Student Supports through Partnership and Shared Accountability**

### **RECOMMENDATIONS**

#### **1. Campuses and segments can increase access to basic needs and reduce student burden by centering students' experiences and perspectives in the promotion, administration, and delivery of basic needs services and supports.**

- A. Encourage campuses to adopt a set of guiding principles that allows for maximum flexibility in the utilization of existing basic needs resources.
- B. Use data from the (i) admissions application and (ii) financial aid application and disbursement process to identify potentially eligible students and to work towards the goal of releasing qualified non-FAFSA benefits (e.g., CalFresh) directly during regular financial aid disbursements in order to proactively facilitate student access of state- and federally-funded resources and services. Include in students' financial aid offer letter contact information to discuss possible re-evaluation of financial aid package if basic needs are not covered, as well as a list of publicly-funded resources with information on how to apply to or use them.
- C. Leverage current reciprocity agreements to maximize existing resources (e.g. staff, contracts and publicly funded resources) during times of emergencies (e.g., natural disasters) to support students' basic needs.

- D. Ensure that emergency assistance does not negatively impact students' financial aid package. Have campus financial aid offices proactively make temporary adjustments to Cost of Attendance through the "professional judgment" process.
- E. Identify alternative resources and provide wraparound basic needs support for students who do not meet eligibility requirements for publicly-funded services and have a demonstrated need (for example, undocumented or international students). Work towards institutionalizing these practices.
- F. Provide staff, faculty, and administrators with ongoing professional development and training focused on healing/trauma-informed care, self-care, and available basic needs supports to deepen their understanding of, and therefore encourage students' access to and use of, basic needs services and supports.
- G. Share current practices and develop campus level equity assessments that are used to identify gaps in resources and service access and lead to system-level action to remove barriers. Regularly share effective institutional practices and marketing strategies through workshops and summits.
- H. Work toward developing debt-free pathways for students, with priority for students facing disproportionately higher rates of basic needs challenges.

**2. Campuses and segments can partner with one another, with city or county government agencies, and with community-based organizations to expand students' access to a full continuum of support.**

- A. Build regional partnerships between campus basic needs practitioners, city and/or county government staff, and community-based organization representatives to develop and implement strategies for strengthening and streamlining support for students' basic needs. These partnerships should identify data driven goals, monitor progress towards those goals, and collectively share accountability by evaluating outcomes.

Specifically, this partnership could facilitate the following:

- B. Increase support for current unhoused students (including through rapid-rehousing support and other housing stability programs) and leverage local/state partnerships and resources to build more affordable student housing for students and their families.

- C. Ensure that college students are able to access and are served equitably by Prevention and Early Interventions and direct services under the Mental Health Services Act funding (Prop 63 funds).
- D. Increase access to subsidized transit passes for California College students through the convening of regional college systems and their local transit authorities.
- E. Identify barriers that prevent students from applying to and qualifying for CalFresh and opportunities to increase and track uptake.
- F. Expand access to EBT on all campuses. Pilot a partnership between county and higher education institutions with and without CalFresh Restaurant Meal Program (RMP) that extends the program to every dining hall on campus for unhoused students.
- G. Partner with the private sector – including CBOs, philanthropy, and businesses – to ensure students have access to devices and the Internet.

**3. Segments and the state can work with one another to streamline deployment and maximize uptake of available publicly-funded resources.**

- A. Build relationships between segment and state leaders to identify and address the gaps in uptake of publicly available basic needs supports and services. This partnership can identify clear goals and related impact metrics based on implementation data across the segments and relevant state agencies.

Specifically, this partnership could facilitate the following:

- B. Name college students as a priority population in eligibility requirements for publicly-funded basic needs related services and supports.
- C. Ensure early identification of high-need students through partnerships, data sharing, and provision of campus resources between K-12 and higher education, and between higher education institutions, so that students receive pre-matriculation access to a bridge of support to and through college. For example, support data sharing agreements so that Free and Reduced Lunch eligibility data from K-12 can be used to proactively identify students that may be eligible for services such as CalFresh.

- D. Identify strategies for bridging data from the segments and state agencies to track eligibility rates, approval/denial rates, reasons for denial, retention rates, as well as experiences, outcomes, and trends of state investments and efforts with specific attention to sub-populations with unique eligibility criteria (for example, student parents, undocumented students, and international students).
  
- E. Advocate for the creation of a centralized navigation system of federal and state services for students which identifies the full suite of supports for which they qualify (e.g., financial aid, CalFresh, housing programs, healthcare, mental healthcare, subsidized childcare, transportation, internet/technology access support, etc.). This would be introduced to high school seniors and upon college matriculation, all college financial aid counselors and basic needs coordinators would continue to facilitate and actively promote use of the platform through the student's higher education experience. This platform would also include a FAFSA landing page with links and resources for assistance.

## **Conclusion**

Providing equitable access to basic needs resources and services – and doing so effectively with dignity for all recipients – will depend on active, equal partnerships between higher education institutions, cities and counties, the state, and the private sector. California's colleges and universities have developed innovative programming to address students' basic needs and have adapted services to support students amid the COVID-19 pandemic, but more can be done through intentional relationship-building throughout the state to support student success and degree completion. Instead of placing the burden on students to navigate a complicated web of resources, benefits, and services, we must work together to redesign our systems to proactively provide students and families with a full suite of supports. That is what our students need to thrive, and that is what they deserve.

## Appendix: List of Basic Needs Resources

### Basic Needs Model Programs

| Category      | Organization   | Program Description   |
|---------------|--|---|
| Food Security | California Community Colleges Health & Wellness        | <p><b><u>EBT GuideBook</u></b><br/>           A How-To for implementing EBT system on campus</p> <ul style="list-style-type: none"> <li>Includes SNAP application &amp; Stable Food Guidelines</li> </ul>   |
